Projects

2021 **Mumble**   **Nodejs, Express, MongoDB, Cloudinary, EJS, GSAP, Bootstrap**
A web application that lets you share your secrets and embarrassing
moments with the public anonymously. It is a CRUD web app with
many different functionalities. I have used Cloudinary for
cloud-based image management and MongoDB for database.

2021 **GFind**   **React, Context API, Javascript, HTML, CSS**
Github finder helps you to find users in Github. It also gives you brief
information about that user's profile, which includes name, location,
hireable, bio, followers, gists, recent repos, and much more. I have
worked with Github API and used React Framework for this project.

2021 **Your Sudoku**   **React, Sass, Framer Motion**
A DSA based project integrated with web development that gives
solutions to your sudoku with backtracking and also lets you solve
randomly generated sudokus.
Project Link

2020 **Kryptoblaze**   **Unity, Photoshop**
A 2d top-down shooter game with a dark story and cartoonish
characters. I used Unity for game development, Photoshop for
designing characters and levels. Acted as a team lead and learned a
lot about teamwork with this project.

2021 **File Organizerary**   **NodeJS**
It is a NPM package to organize your messy folders in a systematic
manner. One can also visualize all the directories and files inside
them in a tree structure. It's a proper NodeJS project where I used
the File System Module of Node
